

Stay ahead with Windows 11

Enhance and protect your digital workspace
with the power of Dell PCs and Windows 11.

Are you
future-ready?

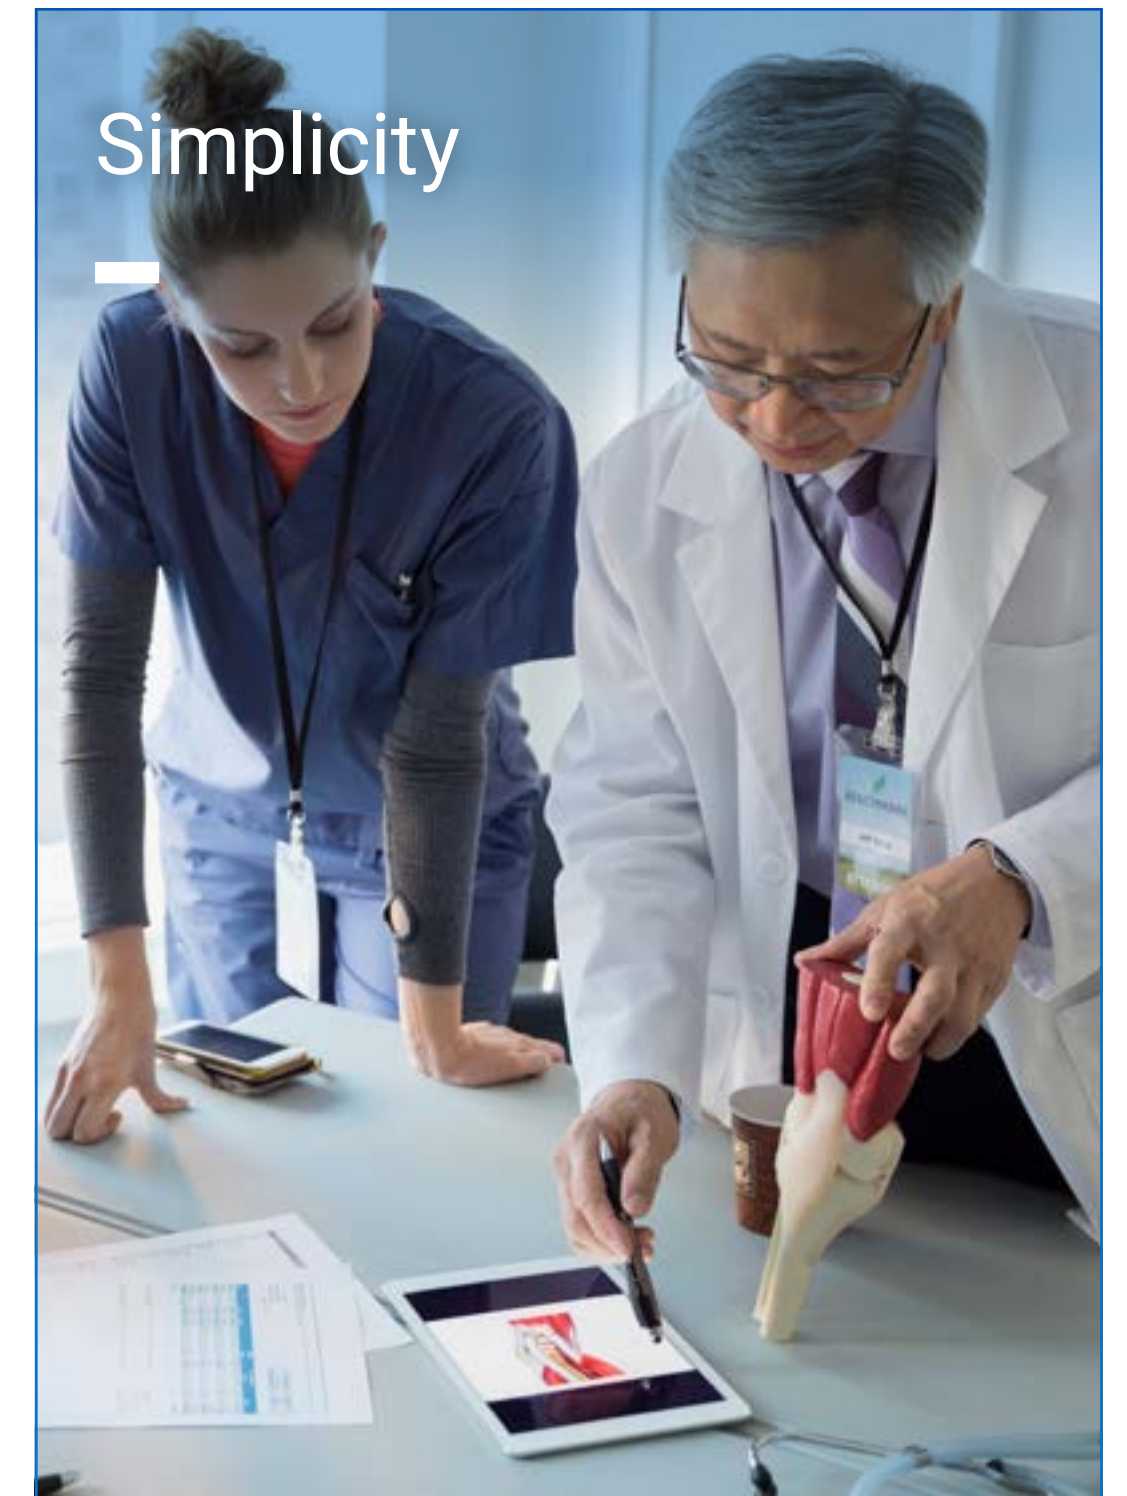

Transition to Windows 11 seamlessly

Upgrade now to stay protected and up-to-date

The time to plan your move to Windows 11 is now. With Windows 10 reaching end of support on 14 October 2025, which means security updates will no longer be available, your organisation could be exposed to cybersecurity and compliance risk, and disruption.

If your devices are still running Windows 10 or are more than four years old, it's time to plan your transition to Windows 11 and the latest Intel-powered Dell PCs.

Upgrading will provide a reimagined experience that enhances productivity, security, and creativity across your organisation.

Manage costs and enhance performance

Upgrade now to stay protected and up-to-date

Extended support for Windows 10 from Microsoft carries a cost per device that increases year-on-year:

Year 1	Year 2	Year 3
\$61	\$122	\$244

Over three years, this adds up \$427 per device, which could significantly impact IT budgets. And with original equipment manufacturers (OEMs) no longer loading or supporting Windows 10 on their devices, drivers – and therefore devices – will become obsolete.

With less than a year remaining, many organisations still lack a defined upgrade plan, making it crucial to act now. Dell can help you navigate the transition and mitigate the financial impact. Our integration with Microsoft Intune for modern device management helps to ensure a seamless transition, ensuring you are not reliant on legacy device build technologies such as Microsoft MDT, which has recently been deprecated. Microsoft recommends a shift to cloud-native device management rather than hybrid solutions to help future-proof operations.

By upgrading to Windows 11, organisations benefit from:

- Enhanced security features to combat modern threats
- Improved performance and efficiency
- Reduced operational costs associated with legacy systems

Dell Services

- Leader in supporting OS transitions through our extensive experience, broad portfolio and service solutions.
- More Microsoft competencies than any other partner, with a global end-to-end supply chain.
- Support from planning, migration and application assistance to Microsoft 365, Microsoft Entra ID and AI configurations

Take proactive steps today to ensure your organisation stays protected, compliant, and ready for the future.

Next steps

Dell Technologies, in partnership with Intel, can support you to successfully migrate to Windows 11 for enhanced security, performance, and compliance.

Dell Technologies, in partnership with Intel, can support you to successfully migrate to Windows 11 for enhanced security, performance, and compliance.

Our focus is on facilitating a smooth transition, with minimal disruption and maximum business value. With our proven expertise and experience supporting over 16,000 customer installations worldwide, you can trust Dell Technologies as your strategic partner to navigate this critical transition and future-proof your IT environment.

Let's start today

Our team of Windows 11 specialists is ready to guide you through the upgrade process, providing expert insights and tailored migration strategies to meet your business needs.

Start by booking a fee-waived, half-day half-day Dell Accelerator Workshop for Windows 11 migration, where we will help assess your current environment and outline a step-by-step transition plan.
